

## Energy efficiency expertise rooted in decades of excellence.

From small greenhouses to complex, indoor growing facilities, our team of energy engineers and industry experts provide a comprehensive variety of services including energy efficiency, measure analysis, turnkey program delivery expertise, net zero planning and more.

 **Energy Efficiency**  
**Reducing energy use is always step one.**  
Let the national leader in energy efficiency identify cost-effective upgrades and potential incentives for your facilities.

 **Decarbonization**  
**Helping you create, reach and surpass your sustainability goals.**  
Our experts are ready to map out energy use and identify areas of improvement to reduce your overall carbon output and operational costs.

 **Strategic Energy Management**  
**Implementing strategies for long-term impact.**  
We work with you to create a long-term plan for reducing energy use that includes goal setting, tracking progress and ongoing results reporting.

 **Design Build**  
**Solving complex energy challenges at scale.**  
Our experts help you clearly define retrofit energy project requirements and then deliver turnkey results for critical facilities.

### Breadth of capabilities and impact

#### Our People

500+

C&I Professionals

35+

States and provinces with active projects
