## Carbon Consulting

DISCOVER

Uncover where opportunities lie.

As you begin to fully understand your carbon footprint, the natural next question is, "now what?" Our carbon consultants work with you to take inventory of your facilities and emissions sources to discover your highest carbon contributors. Together, we'll determine where you can make the most significant operational improvements for noticeable change, both to the environment and your bottom line.

### Let's identify your focus areas.

No matter what size facility or organization you are, understanding where to start reducing your carbon emissions can seem overwhelming. Let our team share our decades of experience as you make a plan for what's next.

#### ① Analyze

Review all energy use and carbon emissions data collected to make sure you have an accurate and comprehensive carbon footprint measurement. For larger facilities, our team delivers technical in-person assessments that are specialized to provide solutions to complex or unique energy challenges.

#### ② Identify

Evaluate and review all emission sources in our unified platform, CLEAResult ATLAS™, to identify usage trends and understand the next steps that will be needed in order to make emissions reductions.

#### ③ Prioritize

Collaborate with our team of experts to establish a list of priority projects, including any existing goals like reaching net zero, based on the data collected and analyzed. We'll also advise on how to reduce your annual emissions output while keeping your energy efficiency goals and budget aligned.

### Key areas of focus

#### Behavior

Saving energy often starts with simple behavioral changes to use less each day.

#### Equipment

Upgrading outdated equipment to certified, energy-efficient models ensures your savings last.

#### On-site generation

Producing on-site renewable energy is likely easier and more affordable than you think.

#### Offsets

Purchasing carbon offsets for any remaining energy usage lets you reach your goals with ease.

## CLEAResult ATLAS™ | Carbon

Our all-in-one carbon consulting solution.

- ✓ Customer-centric UI
- ✓ Customer service and support
- ✓ Project management and reporting
- ✓ Secure data storage
- ✓ CUSUM or regression modeling
- ✓ ESG reporting standards

We change the way people use energy, *for businesses.*
